- Adultery**----- --Proverbs 6:32
- Time**----- Ephesians 5:16
- Innocent**----- Ezekiel 18:20
- Obsession**----- Jude 1:7-8
- Negative**-----1 Corinthians 6:9

Fornication is the most dangerous internal activity for any human being to commit against himself or herself with an unmarried partner. This act, which affects the inside of the body, violates the seventh of the ten commandments, committing adultery. Fornication is the sin that affects potentially seven out of the other nine commandments that are listed. Do you know the possible seven?

Fornication potentially surfaces when an individual allows their imagination of someone to run wild, and then it becomes heartfelt. This lingering emotion changes from suggestive to objective. Now, these repetitive thoughts become a reason for pursuit.

If you know someone that is struggling with this issue, they need to be careful because if they go near or hear the person, the mention of the name and they are not able to concentrate, that could lead to potential problems.

Fornication could threaten a relationship when a person decides to compromise and convince themselves that it is okay to dream or imagine another. For singles, disloyalty to yourself and God is a high risk. For couples, the obligation to each other.

Fornication and adultery work together over time. The more time spent thinking about it, the more opportunity for consideration. The consequences are the impact it could have on the future and the environment around you.

Fornication can ruin the ambition of a person by indulging in such practice.
