What is Idolatry? Idolatry is a person, pleasure, or thing that replaces God inside your heart. This activity is something that may consume your thoughts and take up most of the leisure time. Idolatry is long-term for idols that are controlled by devils. These spirit beings use these idols to lure human beings away to live the ungodly lifestyle. These idols become obstacles for an individual because it prohibits freedom to engage with other things. The passion for the idol increases, while the other significant things become a hindrance. This daily routine for such a person will seem as though nothing is wrong to them. The idolator will feel as though everything is normal and would not see any problem with how they live. However, this lifestyle limits the time of the idolater with other groups of people like family, friends, and significant others.

Prayer: Dear God, help me not to allow the things of this world to take your place in my heart. Thank you God.
