Generation is a body of people living collectively together at about the same time within a society. However, in every era for a group of human beings, there is some form of influence. The degree of impact on the body of people is generation influence. Do we have control like the weather to stop whatever the forecast predicts?

Generation influence is a person or people that potentially experience unexpected life challenges. Similar to weather, sunshine or rain, hot or cold, wind or snow, may come our way, only God knows.

Influence on a person or people depends upon the human beings we encounter through life. Some will have a negative or

positive background that eventually surfaces. These influential people could be family, friends, neighbors, or strangers. We will need to decide. Will this person have a good or bad influence on my life? *Influences come in the form of government. These people help run the country we live in and impose rules and regulations. They enforce the law that we must abide by that is mandatory. God expects us to follow them. However, if there is something contrary to God and His commandments, He anticipates us to take a stand.*

Influences may come in the form of illegal groups. This number of individuals is a threat to hurt lives instead of help. Groups that break the law that is in organized crime and affect generations that would destroy lives.

People that choose to follow the wrong crowd of influence or influential promoters that bait others to join are equally at risk. They live a life similar to an eye for an eye or a tooth for a tooth.

The path of influence begins with our eyes. As the old song goes, "be careful with your eyes with what they see." The ears are equally important as well, "be careful with your ears in what they hear." These two senses God made about the same level on our faces.

Generation influence depends upon the two senses: the pair of eyes and ears. Please use caution to avoid unnecessary misfortune and negativity.
